MARKET WATCH / SCOPED MONITORING

Keep a defined market in view.

A proposed company-specific monitoring pilot for one agreed mining market and product category.

PILOT ENQUIRIES

The questions we help you explore

What is changing?

Follow relevant public developments in an agreed market and product category.

Why could it matter?

Connect selected developments with potential commercial implications for your offer.

What should we investigate?

Identify questions that require customer contact or deeper research.

What the offer provides

An agreed monitoring scope

Define geography, product category, sources, topics and reporting rhythm before the pilot starts.

Focused updates

A proposed digest of relevant developments, source links and concise commercial interpretation.

A pilot review

Assess usefulness and delivery effort before agreeing any ongoing subscription.

APPROACH AND AVAILABILITY

Monitoring is designed around a defined company need. Source coverage, reporting frequency, pilot length and deliverables must be agreed in writing.

This is not a complete tender database, real-time alert service or guarantee of accessible contracts. Outreach and bespoke investigations are separately scoped.

Pilot price: US$349 per company per month. Final scope and terms require agreement.
